COURSE DESCRIPTION

This presentation will demonstrate to the dental practitioner the techniques that will allow them to confidently restore posterior and anterior teeth with direct resin in their daily practice. The hands-on portion of the course will allow the participant to practice the techniques discussed in the presentation. Creation of the appropriately 3-D contoured proximal contacts with predictable contacts and sealed margins will be performed by the participants during the laboratory portion.

ADA C.E.R.P.® | Continuing Education
Recognition Program

SIU School of Dental Medicine is an ADA CERP recognized provider

ABOUT THE SPEAKER

Dennis B. Hartlieb is a graduate of the University of Michigan School of Dentistry, and maintains a full time practice and PACE AGD Teaching Center in Glenview, Illinois dedicated to cosmetic, implant and restorative dentistry. Dr. Hartlieb is an Adjunct Associate Professor both at the Marquette University School of Dentistry, in Milwaukee, Wisconsin, and at the University of Illinois School of Dentistry. He is an instructor at the Center for Esthetic Excellence in Chicago and at the American Institute for Cosmetic and Implant Dentistry in Davisburg, Michigan. Dr. Hartlieb lectures extensively to dentists throughout the US on the art and science of anterior and posterior direct resin bonding techniques. In 2009 Dr. Hartlieb was also recently profiled in Dental Products Report as one of five people to watch in dentistry. Dr. Hartlieb is a member of the American Dental Association, American Academy of Cosmetic Dentistry, and the International Congress of Oral Implantologists.

Refunds are available for courses, minus \$50 processing fee, will be granted if requested at least ten days prior to the start of the course.

PROTOCOL ASSIGNMENTS WILL BE AVAILABLE THROUGH THE ILLINOIS AGD

The objectives of the course are to learn:

Composite Techniques

Dr. Dennis B. Hartlieb

How and when to use Opaquers to create naturally appearing restorations

The importance of Microfill composites for ultimate esthetics in free hand bonding

How to utilize pink opaquers to brighten direct composite restorations

When to utilize Tints to avoid creating the monochromatic, life-less restoration

The appropriate materials and methods necessary to create properly contoured and polished composite restorations

Putting it all together; the utilization of a systematic approach utilizing Nanofilled composites, Opaquers, Tints, & Microfills to create natural, beautiful and predictable anterior direct resin restorations

Step-by-step techniques that work-overcoming tooth sensitivity, preventing microleakage achieving natural contours routinely and creating life-like restorations

Answers to their questions regarding Self Etch adhesives; how to make them better and when not to use them

To explore variations from traditional G.V. Black preparation designs for posterior direct resins

A novel technique to create exquisitely contoured Class II proximal walls

Protocol Reporting Session:
