A variable annuity is a long-term, tax-deferred accumulation product. In its most basic terms, an annuity is a contract between you and an insurance company to accumulate funds and then to provide lifetime payments. A variable annuity allows you to adopt a personal investment strategy to allocate your investment among a range of investment portfolio options. An annuity contract has two phases: An accumulation phase, which allows tax-deferred growth potential, and an annuitization phase, when you withdraw your money plus any earnings your annuity has accumulated.

There are fees and charges associated with variable annuities, which include, but are not limited to, mortality and expense risk charges, sales and surrender charges, administrative fees, and additional charges for optional benefits. Amounts in the annuity's variable investment options are subject to fluctuation in value and market risk, including loss of principal. Certain types of contracts, features and benefits may not be available in all jurisdictions. Withdrawals will be subject to ordinary income tax and, if made prior to age 59 1/2, may be subject to an additional 10% federal income tax penalty.

**Please consider the charges, risks, expenses, and investment objectives carefully before purchasing a variable annuity or making an investment portfolio decision. For a prospectus containing this and other information, please contact a financial professional.**

**Read it carefully before you invest or send money.**
