

Frequently Asked Questions

CRNA Anesthesia Program

- **I am interested in the CRNA and currently hold a degree in another field. Is there any alternatives for me for entering your program without a BSN?**
The nurse anesthesia program is a master's degree program therefore requiring a Bachelor of Science in Nursing as an admissions requirement. In addition to the BS degree in nursing, you would also have to complete 1 year of ICU-critical care experience to be eligible to apply.
