

INCLUDING PLOTS FROM GEOGEBRA IN A L^AT_EX DOCUMENT

- (1) Start Geogebra.
- (2) Create the desired graphic.
- (3) Click on the plot so that the orange box appears around the plot.
- (4) Go to File, Export, Drawing Pad as Picture, choose PNG as the format and save the file in the same directory as your L^AT_EX .tex file. (We assume that you saved the file as geogebraplot.png.)
- (5) `\includegraphics[width=2.5in]{geogebraplot}` % Adjust width as desired
