<sup>A</sup>: Export Data Source – World Institute for Strategic Economic Research (WISERTrade) via Census Bureau July 2019

<sup>B</sup>: Export Employment Source – DCEO-REMI analysis using: Dun and Bradstreet, Census Bureau, NAR, The Trade Partnership via the U.S. Bureau of Economic Analysis and Moody's Analytics data. *This stat will be updated in summer of 2019*

<sup>C</sup>: Export statistics are based on Origin of Movement methodology by the Census Bureau which collects information from the Customs and Border Protection from bills of lading. Has a known and important shortcoming especially with regards to agriculture consolidation and consolidation in general at coastal ports. Logistics companies and commodity trading firms may be the exporter of record even though the products came from a different state/producer.

For the State of Illinois, analytical adjustments of census data by WISER Trade using USDA farm cash receipts yields a 2018 export total of \$68.08 Billion a \$2.59 Billion-dollar difference. Boosts Illinois to 5th position nationwide. Data is still denoted preliminary but has undergone July data revisions. Agricultural adjusted trade figures are only available from 2012.

<sup>D</sup>: Foreign Direct Investment Data Source – Dunn and Bradstreet March 2019 \* FDI employment data (domestic) is subject to market fluctuations. \*\*L: Foreign country employment reporting based on modeled data.
