

SOUTHERN ILLINOIS UNIVERSITY
EDWARDSVILLE
INSTRUCTIONAL TECHNOLOGY

Winter Session Courses
Three-Weeks • 100% Online

In just three-short weeks over the winter holiday, you can earn three-credit hours of graduate-level coursework in Instructional Technology. Take one of the following courses. Both of these courses count toward the Professional Development Sequence called “Teaching with Technology.” They also count toward a certificate in “Classroom Technologies.” Don’t miss this hot opportunity in some cold winter months to earn graduate-level credit. The courses start on December 21, 2020 and end on January 10, 2021.

Designing Digital Materials (IT 561)

- Gain experience with various technological tools designed to enhance student learning.
- Learn production techniques for photo editing, video editing, digital presentations, and coding.
- Design and develop a variety of digital materials to enhance student learning and productivity.

Social Media for Teachers (IT 562)

- Explore a wide variety of social media platforms and consider their educational merits.
- Develop strategies for integrating social media into lesson plans and activities.
- Consider possibilities for “flipping your classroom” through the use of social media to extend student learning beyond the classroom.
- Develop techniques for teaching your students to use social media for effective communication.

***Instructional Technology offers various for-credit and non-credit credentials.
