

Student-faculty interaction

We are planning to have student-faculty interactions (30 minutes) in two different topics. Examples of questions/issues for discussion in each topic are listed below. However, any related questions or issues are open for discussion. Please, select **a topic of your interest during registration**. If you don't plan to join any of the breakout sessions, you could select **"None"**. We would like to **request faculty members** to register for one of breakout sessions such that students can interact with faculty members. Based on the registration, the moderator will create "Break-rooms" in zoom and participants will be assigned in each "Break-room". If you would like to swap the topic during the "Interaction", you have to **notify the moderator** via a **"Chat"** function in zoom and the moderator will move you to another breakout room.

1. Future career in academia (e.g., faculty, research, etc.)

- How to apply for PhD programs (for MSc students)
- PhD project proposal and final dissertation defense
- Pros and cons of academic careers
- Faculty search and selection processes
