CAREER PATHWAY AS A CONSTRUCTION SUPERINTENDENT

There is currently a shortage of construction workers.

The construction industry has recovered and grown since the 2008 housing crisis, but there is still such a shortage of workers that the construction industry can’t fill the demand. Many companies are tackling the issue by offering competitive benefits and battling misconceptions.

A Construction Superintendent is responsible for monitoring construction projects for their entire lifecycle. Their duties include budgeting supplies, equipment, and labor and ensuring all safety, quality, and health standards are met.

AVERAGE ANNUAL SALARY

- National - $116,604
- St. Louis Area - $114,808
