

Essay on Ethics

The Department of Mechanical Engineering requires all graduate students to write an Essay on Ethics. Each student is required to submit the Essay on Ethics to his/her major Adviser before a thesis/project defense is scheduled. The Essay on Ethics is used by the Graduate Defense Committee to assess the ethical aspects of the thesis/project during the defense.

At a minimum, the Essay on Ethics should include the following:

- 1) A statement of originality and accuracy of the research work;
- 2) An understanding of the impact of the conducted research on environment and society in an ethical manner.
