Differential Tuition

The School of Engineering began assessing differential tuition to all students in the School of Engineering registering for the first time in Fall 2014. All undergraduate students admitted into the School of Engineering will be admitted into the *Undeclared 'School of Engineering'* designation. While students are in the *Undeclared 'School of Engineering'* status, they will be assessed tuition and fees at the same rate as any other undergraduate student bearing the same admit term, rate code, residency, campus, and number of credit hours. The differential tuition rate will apply when the student has declared a major in the School of Engineering, and enrolls in any 300-level (or higher) course in the School of Engineering
