# Forthcoming change to Questionnaire position in left menu of Proposal

Jessica Peck

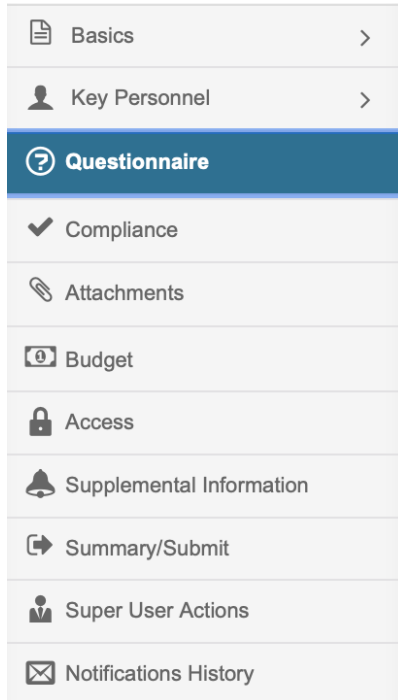

15 days ago · Updated

Follow

In order to have a more logical path when a user completes a proposal we will be moving the Questionnaire option in the left navigation of a proposal in Kuali Research. **Currently** the Questionnaire option in the left navigation is after the Attachments tab:

- 📄 Basics >
- 👤 Key Personnel >
- ✓ Compliance
- 📎 Attachments
- 🔍 Questionnaire**
- 📊 Budget
- 🔒 Access
- 📌 Supplemental Information
- 📄 Summary/Submit
- 👤 Super User Actions
- ✉ Notifications History

However, since institutions may want to ask researchers if they have specific compliance concerns (or other areas of the application) in the Questionnaire section it makes more sense to put it earlier in the left navigation. Then the questionnaire responses can lead into the Compliance section afterwards to create a better flow with the KRMS validations. So **after** this change the left navigation options will look like this:

We plan to roll this change out to PRD environments the week of 9/20/21 to allow you time to update any documentation you may have locally. If you have any questions on this change or concerns of the timing please submit a support ticket.
