1. What are your current 3 main areas of research?

- Technology in clinical practice / Integration of point of care ultrasound for primary care practices
- Outpatient antibiotic stewardship program / Evaluation of clinical practice in the use of antibiotics and bacteria resistance in community settings
- Social solutions to medical issues in the community / collaboration between medical school and community. The birth of the community healthcare worker and patient centered medical home.

2. What are the top 3 areas of expertise/tools you are looking for in a research collaborator?

- Statistical analysis and project design
- Grant writing, data mining, application design
- Willingness to collaborate with an inter-disciplinary team

3. What 3 skills/tools that you have access to, are you willing to share with a potential research collaborator?

- Four primary care residencies throughout the state with approximately 10 clinical sites in rural and urban areas. Four sites all have electronic medical record and can be integrated for data collection in areas away from a large medical center.
- Expertise in curriculum development
- Expertise in integration of technology, i.e. point of care ultrasound, in the clinical setting
