

Individual Questions

Thank you for preparing a FINAL REPORT for your project funded through the Graduate School's internal research grants program. The information you provide in this report survey will assist the Graduate School in understanding outcomes of its funding mechanisms and to promote awarded projects. Below are tips for using this survey.

1. Only one final report per awarded internal grant is required. Therefore, if an awarded project includes more than one investigator, the team submits one report for the entire team. (See Graduate School guidelines regarding external grant submission requirements for each of the PIs and Co-PIs.)
2. The survey program uses cookies to track your progress in the report survey. You may complete the survey in portions if you use the same web browser each time you work on the report. You may close your browser and return to the same section of the survey if you use the same browser. If you do not use the same browser, you may risk losing your answers.
3. Once you answer the last question of the survey, the survey will close and will not be further accessible to you. Before the last question, you will be prompted to check your answers. Use the <<Previous button to check your answers before selecting the final "submit" option.
4. You may save each page of your survey by selecting the "Print" option in the menu of your browser and then select "Save as PDF" from the printer menu. This must be done before selecting "submit" on the final page of the survey.
5. You must select the "submit" button in order to submit your report.
6. You will receive an "end of survey" notice upon completion of the survey. This will serve as your confirmation of receipt.
