1. What are your current 3 main areas of research?
   - Role of gonadal steroids in the regulation of brain differentiation
   - Innovative teaching methodologies
   - Evidence-based teaching

2. What are the top 3 areas of expertise/tools you are looking for in a research collaborator?
   - Imaging technique to be used in the neurobiology research
   - Receptor quantification in the brain other than western blot
   - Measurement of steroid hormones in the brain tissue

3. What 3 skills/tools that you have access to, are you willing to share with a potential research collaborator?
   - Animal surgeries/techniques in neurobiology/reproductive neuroendocrinology areas: stereotaxy, ovariectomy, orchiectomy
   - Freeze microtome sectioning, micropunching, HPLC with electrochemical detection
   - Flipped classroom and other educational research study design
