

Change the Advanced Options for your survey by clicking on the **Advanced Options** drop-down box on the right-hand side of the gray navigation bar.

[Advanced Options](#)

- **Add Block:** Create a new block of questions at the bottom of your survey.
- **Survey Preview Mode:** Toggle between the Survey Preview Mode, where questions in the editor appear as they will to the participant, and the condensed mode, where the page loads quicker for easier editing.
- **Strip Formatting:** Remove all formatting from the selected question or questions.
- [Auto-Number Questions:](#) Change the export tags for all of your questions.
- [Check Survey Accessibility:](#) See if your survey is accessible for those with disabilities that use screen readers and receive suggestions for improvement.
- **Triggers:** Set your survey to automatically send emails through the [Email Trigger](#) or add participants to a panel every time a response is submitted by setting up a [Panel Trigger](#).
- [Salesforce Integration:](#) Integrate survey information with your Salesforce database (This is an extra feature. Talk to your sales representative to learn more).
- [Quotas:](#) Create and monitor quotas for your survey participants.
- [Conjoint:](#) Add a self-explicated conjoint study into your survey.
- [Translate Survey:](#) Translate your survey into multiple languages, allowing respondents to choose in which language they would like to take the survey.
- [Scoring:](#) Add point values to answer choices to use your survey as a test or quiz.
- **Test Survey:** Generate automated test responses for your survey to see what the data set will look like before sending the survey to actual participants.
- [Import and Export a Survey:](#) Import a survey from a .QSF file or from a .TXT file. Export your survey as a .QSF file.
- **Export Survey to Word:** Export your survey as a Word document.
