## To edit the color scheme of your survey:

1. Click on the **Colors** tab.
2. In the Colors tab you will see a list of items available for edit. These range from the question text to the the question separators in your survey.

3. After deciding which item you would like to edit, click on the color box located to the left of the item. A color selector box will pop up.

4. Select a color by clicking on the color chart or entering in a hex code.
5. Click **Ok**.

Repeat the above steps for every item you would like to change.

More Information

qtips

- When an item has been edited, a circular "X" icon will appear next to the item. Click this "X" to reset the color for that item.
- A red, diagonal line will appear in color boxes next to items that are not enabled. Simply click on the red, diagonal line to enable the item.
- At any time, you can click the **Reset Colors** button to set all colors back to the default color scheme.
