

Click the **purple gear box** on the left of any selected question to see a list of available question options.

Basic options under Question Options:

- [Display Logic](#): Create logic that determines under what conditions your question should be displayed.
- [Carry Forward](#): Pull in the answer choices, statements, or scale points for your question from a previous question in your survey.
- [Skip Logic](#): Skip respondents ahead to different sections of your survey depending on how they answer this question.
- [Randomization](#): Set the randomization options for your answer choices.

For a list of the Advanced Options under Questions Options, visit the [Advanced Question Options](#) page.
