Use Custom Survey Validation Messages...

**Survey Protection**

**Open Access.** Allow anyone to take this survey.

**By Invitation Only.** Allow only those who receive invitation emails to take the survey (this will reject anonymous links).

**Password Protection.** This password must be entered to take this survey:

**Prevent Ballot Box Stuffing.** Keep people from taking this survey more than once.

**HTTP Referrer Verification.** The user must come from this url to take the survey:

**Prevent indexing.** A tag will be added to the survey to prevent search engines from indexing it.

This survey does not expire.

This survey is valid from: 2011-06-21 to: 2011-07-21

**Survey Termination**

**Default end of survey message.**

Redirect to single response report.

End of survey message from a library...

Redirect to a URL full URL, ex. "http://www.qualtrics.com":

Send additional thank you email from a library...

**Anonymize Response.** Do NOT record any personal information and remove panel association (not recommended).

## [Open Access](#)

For use with the Anonymous survey link. Does not limit access.

## [By Invitation Only](#)

Limits access to only those who have received a unique link through the Survey Mailer

- If you turn on By Invitation Only when you are using the anonymous survey link it will not let the respondents take the survey!

## [Password Protection](#)

Allows you to set a single password for your survey.

- If needing a unique password for each survey taker, use the [Authenticator](#) option in the Survey Flow.

## [Prevent Ballot-Box Stuffing](#)

Uses a browser based cookie to mark if someone took the survey once. If they attempt to take the survey again from the same browser on the same computer, they will not be able to take the survey again.

## [HTTP Referrer Verification](#)

Allows you to specify a URL users must come from to access the survey. Useful if your survey link is posted on a particular website, like an internal university or company page, and you want to make sure the link does not get copied and sent to others. Only those who can access that page would be able to take the survey.

## [Prevent Indexing](#)

Keeps search engines, such as Google, from indexing your survey and presenting it in search results. Typically, this is only needed by people with long-term studies where the survey is active for a long time.

## [This survey does not expire](#)

This option is selected by default and indicates there is no set date range for the survey to be accessible to respondents. If the survey is active, the link can be accessed.

## [This survey is valid from](#)

Allows you to click the calendar icon or type in the date directly (YYYY-MM-DD) to specify a date range when respondents can access the survey. Those trying to access the survey before or after the specified range receive a simple message explaining it is currently unavailable.
