Create Cross Tabulation reports in Qualtrics. Cross tabulations allow you to compare answers across multiple questions in a table format.

**create a new Cross Tabulation**

1. Open the Cross Tabulation page in the View Results tab.

![Cross Tabulation page](image1)

2. Click the Create a new Cross Tabulation icon.

![Create a new Cross Tabulation icon](image2)

3. Check the appropriate boxes in the Banner and Stub columns to choose which questions will be the columns and rows in your Cross Tabulation.

![Banner and Stub columns](image3)
4. If necessary, select Use Embedded Data to include Embedded Data fields as rows or columns in your tabulations.

5. If you are using Embedded Data fields, check the appropriate boxes in the Banner and Stub columns, and either enter the field values to be included in the tabulation in the Embedded Data Field Textbox, or click Autofill to bring in all values.

6. Select Create Cross Tabulation.
Remove a Stub or Banner

1. Hover your mouse over the banner or stub you would like to delete.
2. Click the Actions arrow next to the banner or stub text.
3. Select Delete Stub or Delete Banner.
