

## Bioeconomy Career Jobs

Southern Illinois University Edwardsville, Lewis & Clark Community College and other Illinois institutions are coming together to make it easier to get on the path to a great career in the Bioeconomy, an emerging industry that combines manufacturing, clean fuels and technology. In the next 5 years alone, there will be almost 1,500 manufacturing jobs needed in Madison and St. Clair County.

### Register for an In-Person Informational Session and Application

Interested individuals will be invited to attend an informational session with Speakers from the National Corn-to-Ethanol Research Center, Lewis & Clark Community College, and Phillips 66. We will conduct assessments and interviews of those interested to select our first group of participants to start the process in Spring 2017.

### If Selected, You Will Be Able To:

- Enroll in the Lewis & Clark Community College Process Operations Technology Certificate of Proficiency Program (1 Year Program)
- Complete a paid internship at the National Corn-to-Ethanol Research Center

### Career Positions Include:

- **Biofuels Processing Technician** – Avg. Salary \$55,000
- **Chemical Equipment Operator & Tender** – Avg. Salary \$42,000
- **Petrol Pump System Operator, Refinery Operator, & Gauger** – Avg. Salary \$48,000
- **Oil Refinery Operator** – Avg. Salary \$52,000
- **Water & Wastewater Treatment Plant & System Operator** – Avg. Salary \$49,000
