SIUE Speech, Language and Hearing Center

The SIUE Speech, Language and Hearing Center is used as a learning environment for undergraduate and graduate students enrolled in the accredited Speech Language Pathology and Audiology programs. Sessions are conducted by graduate students and are directly supervised by a licensed speech language pathologist. Graduate student clinicians receive direct instruction and feedback for each session.

Each session is 50 minutes in length and is typically conducted two times a week.

All therapy is based on the client's needs after an evaluation has been performed. The clinic serves many adults and children with various speech, language and hearing difficulties.

Our graduate students are tomorrow's future Speech-Language Pathologists.

Services

- Aphasia therapy
- Accent modification therapy
- Voice, fluency and language therapy for adults
- Voice; fluency; speech sound disorders therapy for toddlers; preschool children; school-age children and adolescents
