How You Qualify for Benefits

- You need to work to earn Social Security “credits”
- Each $1,470 in earnings gives you one credit
- You can earn a maximum of 4 credits per year

Example: To earn 4 credits in 2021, you must earn at least $5,880. Earning 40 credits (10 years of work) throughout your working life will qualify you for a retirement benefit.
Social Security benefits are based on your lifetime earnings

- **Step 1** – We adjust or “index” your actual earnings to account for changes in average wages over time

- **Step 2** – We find your average indexed monthly earnings using the 35 years in which you earned the most (do not need to be consecutive and do not need to be most recent)

- **Step 3** – We apply a formula to your “average indexed monthly earnings” and arrive at your basic benefit or primary insurance amount
If your average monthly earnings are = $7,000

Then your full monthly benefit would be = $2,648

90% of First................................................................. $996 = $896

32% of Earnings over $996 through $6,002....... $5,006 = $1,602
($6,002 - $996 = $5,006)

15% of Earnings over $6,002......................... $998 = $150
($7,000-$6,002=$998)

$7,000 $2,648

*Payments rounded to whole dollar amounts
Your Age at the Time You Elect Retirement Benefits Affects the Amount

If You’re a Worker and Retire

• At age 62, you get a permanent lower monthly payment

• At your full retirement age, you get your full benefit

• You get an even higher monthly payment if you delay receiving benefits past your full retirement age
