${ }^{1}$ This course is only offered during odd numbered spring semesters. Because of this, students entering in an even numbered fall will not be able to complete this course during their usual course of study. If a student in the $2+2$ program is on track to graduate in four years and have followed this plan, the Department will replace the Math 420 requirement with another acceptable course or offer an independent study course.
*Students must complete $50 \%$ or more of degree requirements at SIUE.
*A course that satisfies both the ERGU and EREG requirement will only be counted as one and not both.
