### ***Graduate Students' Dissertation, Capstone, Thesis, Applied Project, and Jury Committees***

Since coming to Southern Illinois University Edwardsville in fall 2001, I have chaired one Master's capstone project within Healthcare Informatics, and over twenty Master's projects within Instructional Technology. I have served (both within Instructional Technology and other programs) as a member on more than thirty additional Master's committees, one educational specialist committee, and two Ed.D. capstone project committees. While these projects occasionally use traditional, neo-classical research methods, they are not traditional theses; rather, they are applied projects. Approaches range from "learning by design" to formal instructional systems design. Topics have ranged from the design of computer-based instructional units in corporate settings to early childhood mathematics. In fall 2006, the Instructional Technology program moved away from a project-based capstone and toward a series of juried electronic portfolios. I have supervised approximately fifty students as they completed their juries, and I have served as juror on approximately thirty students' portfolios.
